# Summary of methods

OpenRefine is really useful

Crowdsourcing can be great,

but takes time and thought to set up well.

# Summary of results

 23.4% of these conferences had **free online** proceedings

 45.3% of these conferences had **no findable** proceedings

 Researchers are selective about their PBRF portfolios!

# Summary of results

**Regional** conferences more likely to publish **free online**

**Society** conferences more likely to publish **print / paywall**

# What if....

a global, interdisciplinary, open access database  
designed for conference proceedings

collecting metadata  
and programmes  
**everyone could find**

researchers could upload content  
and copyright policies  
**any conference paper**

**in one place?**

organisers could deposit entire proceedings

so everyone could find any conference paper in one place?

Kia ora koutou!
